Professional Summary

Full-stack developer and MCA student experienced in building scalable web applications using **React, Supabase, PostgreSQL, and REST APIs**. Proven ability to design responsive UIs, optimize backend workflows, and deploy production-ready applications. Strong foundation in **cloud deployment, API integration, and AI-driven development**.

Technical Skills

Languages: Python, JavaScript, SQL

Frontend: React, HTML5, Tailwind CSS

Backend: REST APIs, Supabase

Databases: PostgreSQL

Tools: Git, GitHub, Vercel, OpenAI APIs

Concepts: CRUD, OOP, HTTP/HTTPS, Cloud Deployment, API Integration

Projects

Portfolio Website

2026

React, Tailwind CSS, Vercel

- Developed a fully responsive portfolio website with optimized UI/UX, improving load performance and accessibility across devices.
- Built reusable React components, reducing development time for future features by approximately 30%.
- Deployed using Vercel with continuous updates and performance monitoring.

Maison Noir (Fashion Website)

2026

React, Tailwind CSS, Vercel

- Designed and developed a modern fashion platform with responsive layouts and clean UI, enhancing user engagement.
- Optimized frontend performance and ensured cross-browser compatibility.

Canteen Rush AI

2026

React, Supabase, PostgreSQL

- Built a full-stack food ordering system to digitize campus operations, reducing manual ordering delays by over 40%.
- Integrated Supabase backend with PostgreSQL for real-time data handling and authentication.
- Designed scalable RESTful workflows for efficient order processing and database interactions.

Habit Tracker

2025

React, Supabase, PostgreSQL

- Developed a full-stack productivity application with secure authentication and complete CRUD functionality.
- Implemented real-time data synchronization and efficient state management.

Trackify

2025

JavaScript, HTML, CSS

- Built a lightweight tracking system to manage and visualize user data efficiently.
- Improved data organization and usability through structured UI design.

Experience

Junior Associate, Guidehouse India

May 2024 – May 2025

Technopark, Thiruvananthapuram

- Processed and validated large datasets, ensuring high accuracy and compliance with business standards.
- Automated reporting workflows, reducing manual effort by approximately 25% and improving operational efficiency.

- Identified and resolved data inconsistencies, enhancing overall data quality and client satisfaction.

Web Development Intern, Christ University

2023

Bangalore, India

- Developed and maintained responsive frontend components using HTML and CSS.
- Collaborated with cross-functional teams to improve UI consistency and user experience.

Education

Master of Computer Applications (MCA)

2025 – Present

Christ University, Bangalore

Bachelor of Computer Applications (BCA)

2021 – 2024

Christ Nagar College, Kerala

CGPA: 7.4

Certifications

- Introduction to OpenAI GPT Models – Infosys (2026)
- OpenAI GPT-3 for Developers – Infosys (2026)
- AI-first Software Engineering – Infosys (2026)
- Prompt Engineering – Infosys (2026)
- Android for Beginners – The New Boston (2026)
- Architecting Cloud Solutions on Microsoft Azure (2026)
- Python for Data Structures – Coursera (2025)
- Data Manipulation with Pandas – DataCamp (2025)
- Full Stack Development Certification (2023)
- Internet of Things Certification (2022)
